Perhaps the best tip I could tell you is to never split two tens but always split two eights. The reason is that a hand with two tens can easily add to 20 and your main goal is 21. Therefore it will be hard for the dealer to beat you since he needs 21 when you are much closer to it. Two eights always add to 16 and is said to be the worst hand in blackjack therefore if you spilt the eight you at least have a chance of one winning hand. It seems that back in the day, instead of dispensing coins to winning players, the machines actually paid off in fruit flavoured chewing gum that corresponded to the fruits on the winning line. I have to say that I'm glad that I wasn't around back then, as I'd soon revel in the glory of a big cash win, than have to make a dentist visit due to the damage caused by chewing all that gum. Other special features in The Dark Knight are more randomly discovered, and aren't tied to specific symbols. One of the most entertaining aspects of this machine is the appearances made by the Joker and Batman. The adversaries can show up at random on any spin, and usually serve to give you some extra wild symbols on the reels, or award you with an instant prize. The players' objective in this game is very simple – to choose a series of numbers from 1 to 80 that he hopes will be matched, at least partially, by the numbers that are subsequently “drawn” by the house's RNG (random number generator). Of course the real objective is to win the payouts that predicting and choosing the correct numbers will bring. Since the game of Keno relies very highly on the element of luck, this is not an easy objective to achieve. Therefore, perhaps a secondary goal could be added – to play Keno for the thrill of the game and to dream about striking it rich. The free games feature also gives players the chance to win random cash prizes. Whenever a spaceship appears on the reels, Max Damage will shatter it to reveal a cash prize.
