Gamblers can play up to 5 hands at one time. I don't recommend using this method, unless the betting options are such that you can only bet 20% of your normal wager on each of these hands. This preserves the same bet rate you would have while only placing 1 bet, so the costs of your casino gambling don't rise by five times. While you hope to win, you have to be realistic and understand you're going to lose more often than you win, because of the house edge.
